GRIGIO FUTURA

Unleash your imagination, create new spaces and elements of home architecture. Become an architect of your own surrounding.

Grigio Futura is a special blend of binding materials and polymers with additional chipping of specific properties. **Grigio Futura** is suitable for interior as well as exterior decorations. It is ideal solution both new and old buildings, giving many capabilities in making of new decorative floors, walls and furnitures. With this material it is possible to renew old, used and damaged surfaces without expensive and burdensome refurbishment. **Grigio Futura** is environment friendly product and meets all the requirements for modern materials

used in construction. This is a simple material that creates a durable and flexible surface at just a few millimeters thick. **Grigio Futura** is the ideal material for creating continuous surfaces on existing concrete, ceramic, screed or OSB boards. It is ideal material for houses, shops, salons, hotels and restaurants. **Grigio Futura** besides of renovating existing flooring, it is suitable for vertical surfaces such as walls, GK boards, stairs, shower trays, kitchen counters and other home architectural elements.

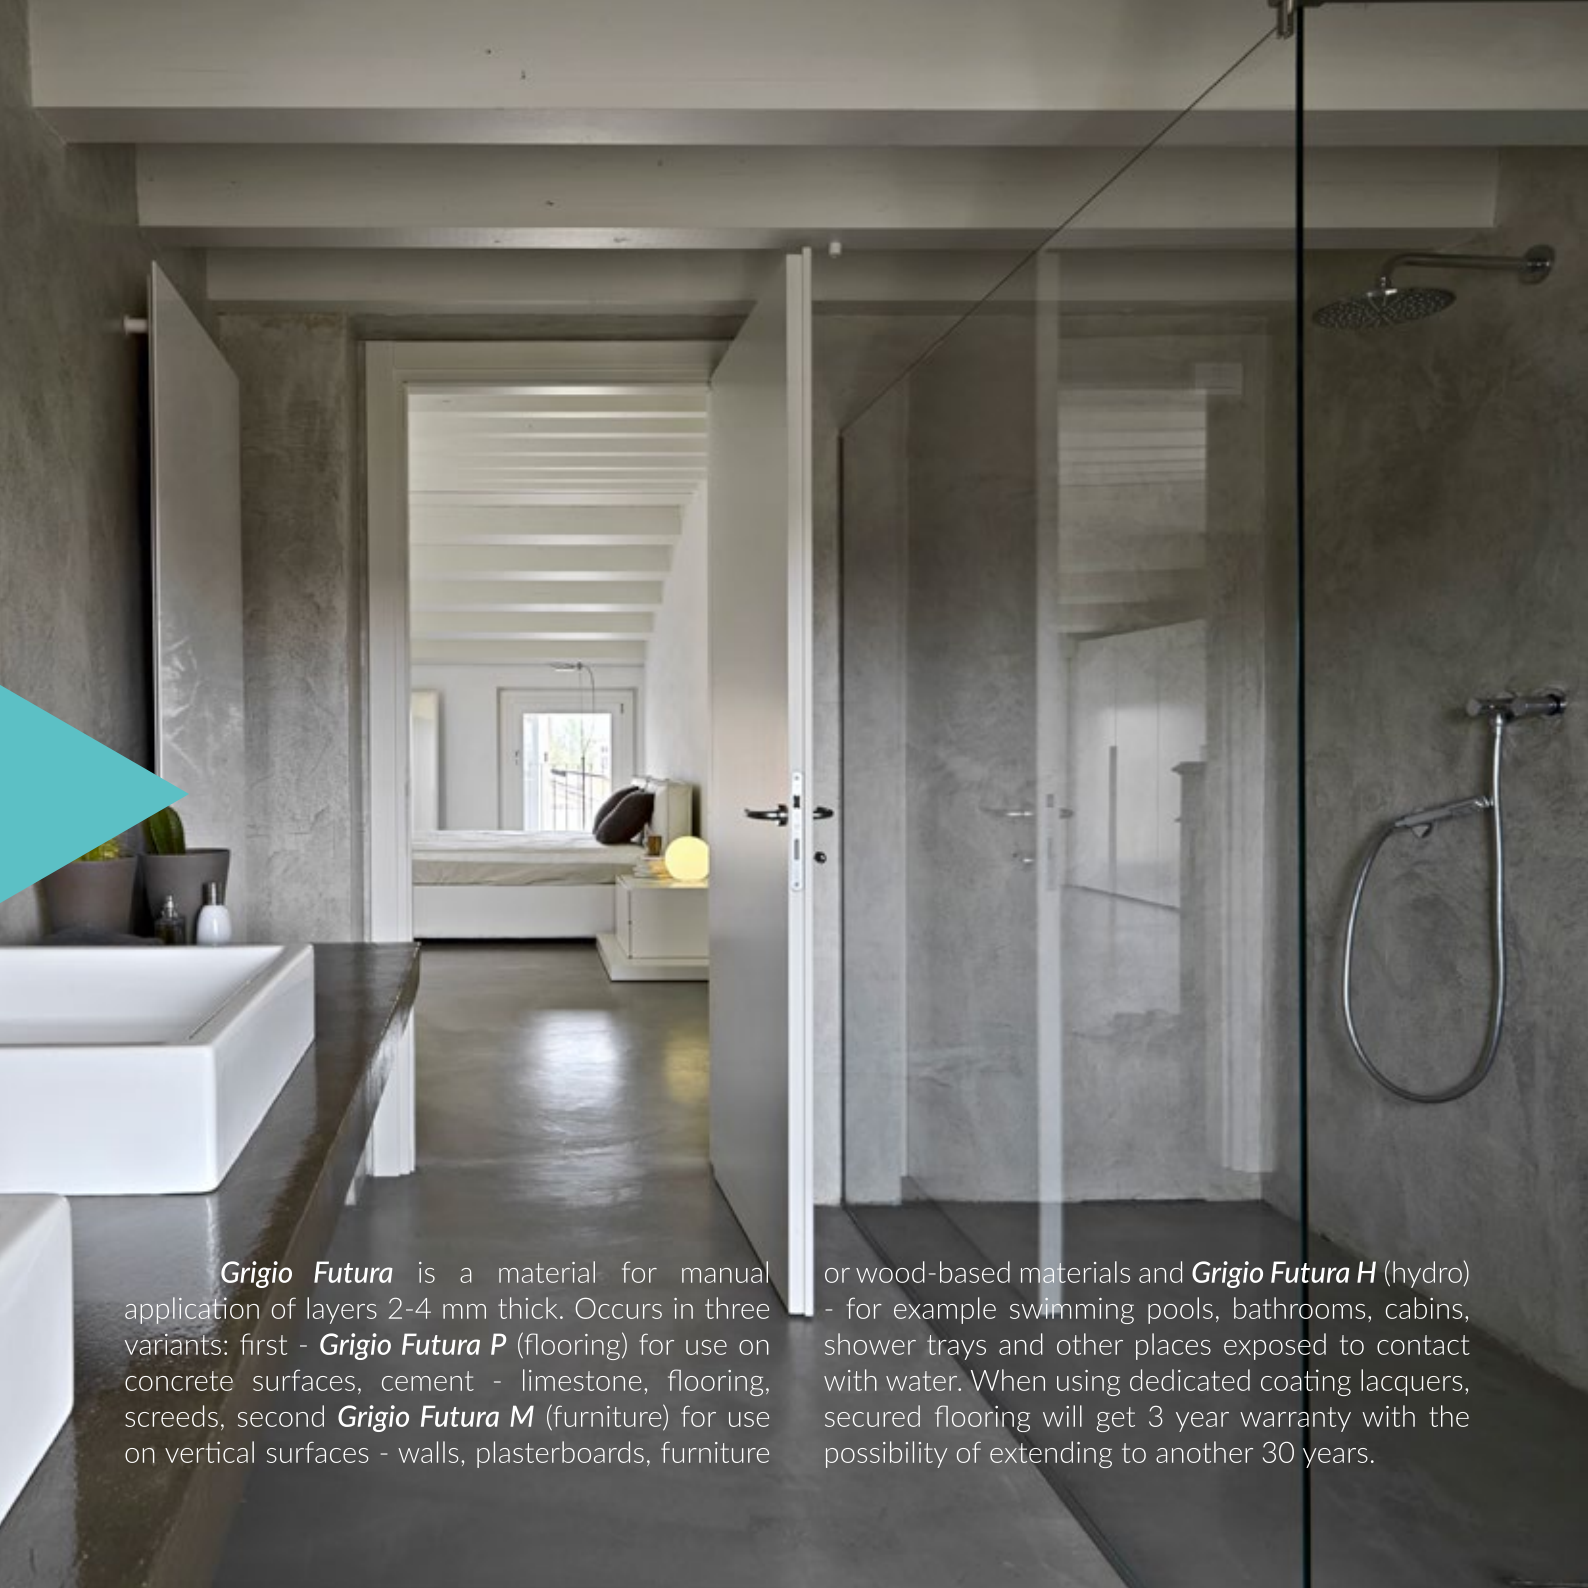

Microconcrete **Grigio Futura** is practical and innovative material. This makes it easy and simple to personalize each surface by changing its color, form and structure. The desired effect will be achieved in just a few days.

Grigio Futura is characterized by excellent adhesion to many types of surfaces. It is resistant to impact, abrasion and compression of substrate dimensions. Perfect for underfloor heating. Also suitable for places with high pedestrian traffic, and after applying suitable protective coatings, it becomes completely resistant to water and UV rays.

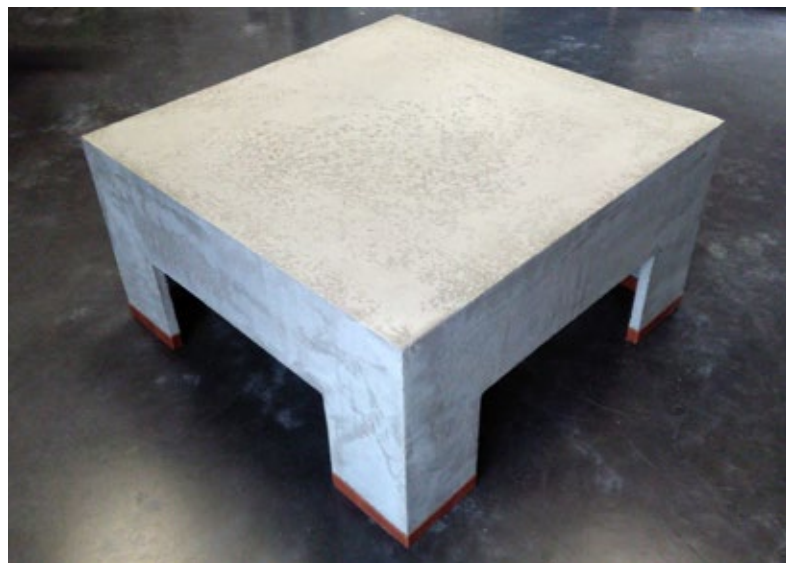

Grigio Futura is a material for manual application of layers 2-4 mm thick. Occurs in three variants: first - **Grigio Futura P** (flooring) for use on concrete surfaces, cement - limestone, flooring, screeds, second **Grigio Futura M** (furniture) for use on vertical surfaces - walls, plasterboards, furniture

or wood-based materials and **Grigio Futura H** (hydro) - for example swimming pools, bathrooms, cabins, shower trays and other places exposed to contact with water. When using dedicated coating lacquers, secured flooring will get 3 year warranty with the possibility of extending to another 30 years.

With hand tools and appropriate application techniques, you get unique drawing and texture of the wall, floor or furniture. **Grigio Futura** can be colored and modeled freely, applied on both flat and curved surfaces.

GRIGIO WALL SYSTEM

Grigio Wall System mineral plaster is a decorative material that gives effect of concrete wall. The **Grigio Wall System** is well suited for industrial interior design replacing architectural concrete facade panels or complementing them in areas where prefabricated construction is difficult or costly. It can be used to finish off plastered or concrete walls and ceilings as well as plasterboards. The **Grigio Wall System** allows for any „concrete” structure,

either smooth, porous or so-called crayfish, using appropriate tools and application techniques. **Grigio Wall System** is a vapor permeable plaster and allows walls to „breathe”. After securing the surface with impregnates or coatings, the plaster is resistant to humidity and the appearance of mold and algae. **Grigio Wall System** can be treated as a supplement or continuation of a floor with a clearer structure and depth.

WALL SYSTEM

TEMPLET OF TEXTURES

Grigio Wall System is a material that, when applied to a wall or other surface, can mimic old, damaged plaster or concrete, stone, leather, sand texture, rain drops, etc. Texture can be arbitrary - abstract and multicolored, patterns can interpenetrate and overlap, creating an interesting and unique surface. The product can be colored during the application and then wipe, grind, work and shape the mold.
